Padang, West Sumatera

Information Systems graduate from Telkom University with an interest in software development and system analysis, with knowledge of data management. Experienced in building and maintaining web applications using HTML, CSS, JavaScript, PHP (Laravel), and React.js. Familiar with mobile application development using React Native and database management using MySQL and DBeaver. Committed to continuous learning and leveraging technology to create efficient, scalable, and impactful IT solutions.

Education

Universitas Telkom - **Bandung, Indonesia** Aug 2020 - Sep 2024

Bachelor of Information Systems, 3.65/4.00

- Final Project: Front-End Analysis in Migrating a Multi-Page Application to a Single Page Application Using the Iterative Incremental Method in the SOFI Scheduling Module Application

Work Experiences

PT Arupadhatu Adisesanti - **Padang, Indonesia** Apr 2025 - Dec 2025

Technical Administrator - Contract

- Inputted weekly field progress data for the bridge construction project including concrete, reinforcement steel, and material volumes and summarized total on-site labor utilization.
- Compiled and summarized periodic progress reports based on field data submissions for the Air Gadang Bridge Construction Project.

Enterprise Application Development Laboratory - **Bandung, Indonesia** Sep 2023 - Jan 2024

Web Application Development Practicum Assistant - Contract

- Actively managed and mentored 6 students across 3 classes, providing technical guidance, code debugging, and official grading, while proactively assisting students and supporting overall laboratory operations.
- Worked closely with the media team to create standardized visual templates, including PPT templates, module templates, and Google Forms for photo collection to improve laboratory workflows.
- Collaborated with a team to design and develop core educational materials for Module 3, focusing on PHP CRUD implementation and real-world case studies for student journals.

PT Industri Telekomunikasi Indonesia - **Bandung, Indonesia** Jul 2023 - Sep 2023

IT Product Development - Intern

- Learned and applied CodeIgniter 4 within two weeks as part of onboarding to build a dynamic web application.
- Developed a full-stack web application to monitor internal shipping documentation, including detail and data update features for each table row.
- Integrated the application with an Oracle Database and used DBeaver to retrieve and manage data.

Organisational Experience

Enterprise Infrastructure Management Laboratory - **Bandung, Indonesia** Nov 2021 - Jan 2024

Operations Division Member

- Managed all EIM social media platforms and produced "EIM FYI" educational content regarding Enterprise Infrastructure Management.
- Collaborated with the HMSI Relations Bureau as the publication committee for public lecture events, designing core digital assets and managing live event documentation.
- Co-conducted technical research titled "Analysis of NMAP Implementation on Network System Monitoring" to explore active network mapping and tracking solutions

Enterprise Data Management Laboratory - **Bandung, Indonesia** Aug 2022 - Sep 2023

Social Media Division Member

- Curated creative content across laboratory social media platforms to increase engagement and document internal and external academic activities.
- Served as the media and live-report committee for the "Hands-on Session: Visualization Using Tableau," handling real-time event documentation and digital publications.
